## WORK EXPERIENCES

### Hbenchmark

FRONTEND WEB DEVELOPER JR. INTERN

Vicenza, Italy | Jul. 2022 - Aug. 2022

- Platform frontend management: continuously adapting the platform's frontend to meet evolving customer and market demands.
- Collaborated with seasoned colleagues to gain insights into the significance of thorough project analysis for achieving scalability in our work.

### Picta Studio

BACKEND WEB DEVELOPER JR. INTERN

Verona, Italy | Nov. 2022 - Dec 2022

- Successfully maintained and optimized various websites, addressing issues promptly.
- Conducted code refactoring to enhance existing functionalities, upgraded programming languages and components/libraries for improved performance.

### Egon

SOFTWARE DEVELOPER JR. INTERN

Verona, Italy | Apr.2023 - Jul. 2023

- Using oracle SQL developer to work with the company database and some customization of WordPress pages. Given the large database it was essential to filter and optimize search results, using SQL and Microsoft Access it was possible to skim large amounts of data to get clean and useful information.

### DevInterface

FULLSTACK WEB DEVELOPER JR

Verona, Italy | Jul. 2023 - Oct 2023

- Website Maintenance: proactively addressed bugs, fulfilled customer requests, and conducted regular maintenance activities for various websites to ensure optimal functionality.
- Technology Upgrades: upgraded Ruby on Rails versions and related gems as needed, staying abreast of the latest technologies to enhance website performance.
- Collaborative problem solving: engaged in daily meetings to discuss workflow, brainstorm solutions, and address specific problems or issues, collaborating with the team to ensure effective problem-solving and workflow optimization.

## EDUCATION

### Carlo Anti

Diploma di Liceo Scientifico delle Scienze Applicate

### Boolean Careers

Nov. 2021 - May 2022

Course of Web Development:

Study and development of both frontend and backend apps. The 6-month course was structured to have lecture in the morning and tutored exercises during the afternoon. Most of the explanations/exercises were about websites and potential real problems. During the final 1-month exercise, my team and I developed a Deliveroo-inspired web application using Vue.js and Laravel, including features such as authentication, a payment system and a responsive frontend.

## SKILLS

Programming Languages:

HTML, CSS, Bootstrap, Javascript, Node.js, Vue.js, PHP, Laravel, Ruby on Rails.

Technologies & Tools:

Slack, Git, Docker, Microsoft Office.

Databases:

mySQL, SQLServer, mongoDB.

Languages:

Italian (primary fluency), English (full proficiency).
